COMPANY PROFILE

for Future

Moving Beyond Boundaries
There is nothing we cannot transport
We deliver more than just transportation
– we provide end-to-end engineered solutions for the future.

Since our founding, we have taken pride in our ability to transport and install anything, continuously challenging ourselves with complex and demanding projects.

Now, as NX Engineering, we are committed to surpassing our past achievements and partnering with our clients to shape the future together.

Effective January 1, 2025,
the Heavy Haulage and Construction Business Division
of Nippon Express Co., Ltd.
will be rebranded as

NX Engineering Co., LTD.

Representative Director and
President Yasuo Miyazaki

Yasuo Miyazaki

Top Message

Achieving Top Partner Status for Customers Through Constructions & Logistics

I would first like to thank all of you for your continued support.

My name is Miyazaki, and I am proud to be the Representative Director of NX Engineering Co., LTD. NX Engineering was founded as a specialty heavy haulage and construction firm in line with the NIPPON EXPRESS HOLDINGS management policy, which calls for reinforcing group management and encouraging advances in all group businesses.

The heavy haulage and construction business we offer encompasses all of transportation, installation, and assembly, giving form to your request through our advanced, reliable technical expertise. Customer equipment or devices are transported to the designated location, installed as required, and assembled into a ready-for-use state. We can even help across the product life cycle, with inevitable maintenance and upgrading.

Our Heavy Haulage & Construction Business Division of Nippon Express Co., LTD. has supported customer

infrastructure projects throughout Japan and abroad since just after World War II, and continues its role to this day. NX Engineering carries on that expertise, ingenuity, organizational strength, and trust from our customers, using it to provide superior services.

In the present environment, energy demand is expected to increase alongside ongoing demand for infrastructure maintenance and modernization. This makes the significance of our reason for being, "to contribute to society through our customers' business," all the more real for us, and we believe in our ability to inspire and energize those around us with our enthusiastic efforts toward that end while also contributing toward business as we do.

Our goal is to become the number one choice among customers for construction and logistics in all fields we serve. We also hope our employees and their families will continue to select us as the number one most reliable partner to work with.

Mission Vision Value

Mission

What we aim to accomplish

We strive to connect transportation, installation, and assembly, and to implement this with our superior technology and reliable construction capabilities. In doing so, we will contribute to creating a more prosperous and sustainable society.

Vision

Our long-term goals

To remain trusted in all areas of the heavy haulage and construction industry, and to be the number one company chosen by our customers for construction and transportation.

Values (Code of Business Conduct)

Actions carried out to achieve our Vision

Form close connections with our customers to build lasting relationships.
Explore, create, and provide new technologies.
Contribute to the creation of a safer and more secure society.

Learn about NX Engineering

From the Nippon Express heavy haulage and construction business division to NX Engineering. We will be making full use of the experience and track record of success that we have built up in the heavy haulage and construction sector to take on new challenges in the future, so that our expertise can continue to benefit others going forward.

NX Engineering's Aspirations

NX Engineering's goal is to be No. 1 for our customers, our employees, and our employees' families, through Transportation, Installation and Assembly.

To realize this goal, we will build strong relationships of trust so that our customers feel confident entrusting us with projects that are important to them. We are also aiming to create optimal workplaces in which our employees can work as proud, motivated professionals, and we are seeking to help protect the global environment that underpins all of the above.

Unshakable trust

Continuing to meet customers' expectations is what earns unshakable trust. We will be striving to ensure that customers feel peace of mind in entrusting projects to us, because they know that "If NX Engineering are handling it, it will be fine."

A constant striving for new skills

Taking pride in our work as professionals, we will continue to explore new skills, so as to meet customers' needs, and further enhance our own capabilities.

A society in which people enjoy safety and peace of mind

Giving first priority to safeguarding the global environment, we are working to help realize a society characterized by safety and peace of mind. We will be endeavoring to ensure that we can continue to support society through Transportation, Installation and Assembly.

NX Engineering's Strengths

1. Technical excellence

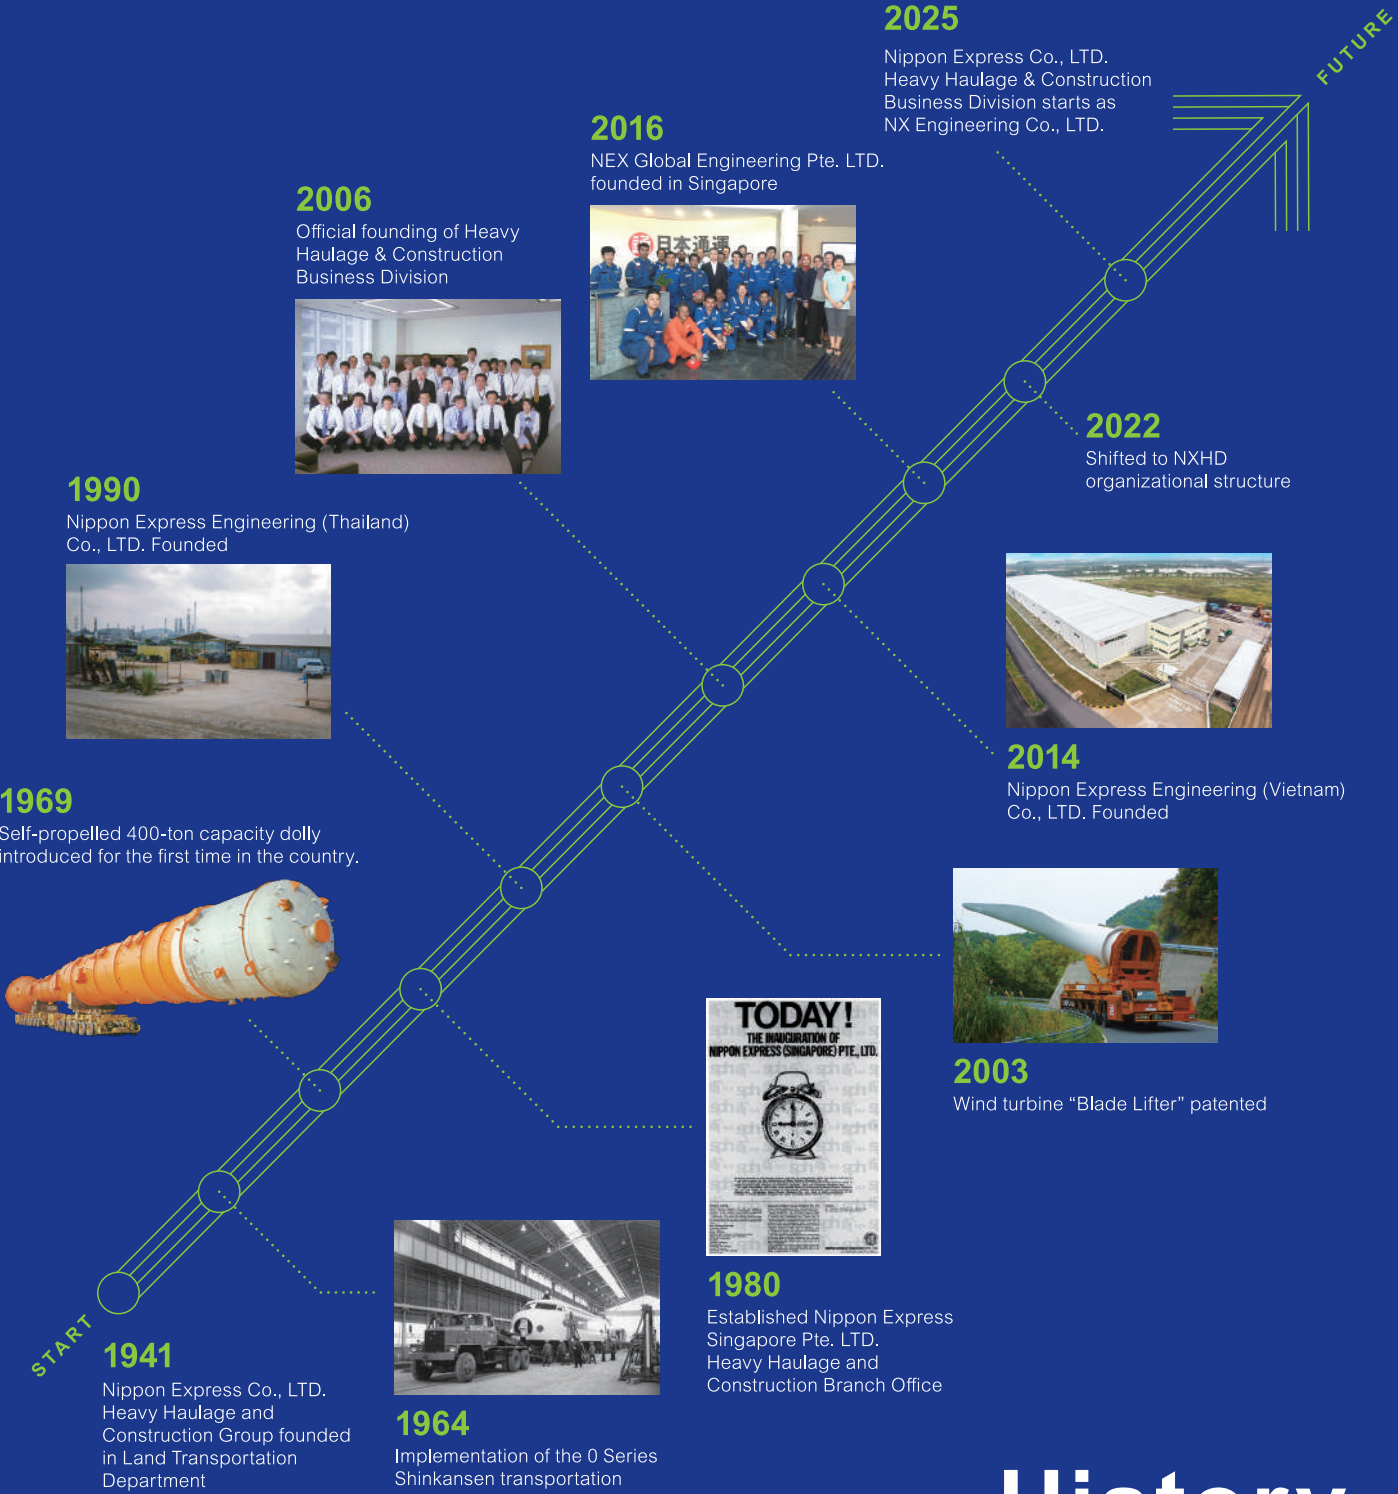

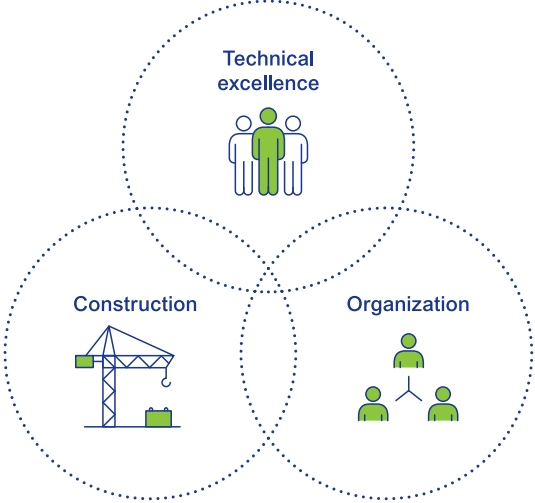

We have a wealth of human talent throughout Japan who possess the technical skills, proposal development capabilities and engineering skills needed to meet customers' expectations for challenging tasks, including large-scale projects. Especially, Technical excellence is one of our key strengths, and embodies the pride that we take in our work.

2. Construction

The experience, track record of success, and data that we accumulated as the Heavy Haulage & Construction Business Division of Nippon Express Co., Ltd. has laid the foundation for our construction capability as NX Engineering. We will be making effective use of this capability in future projects, as we continue to support the business operations of our customers going forward.

3. Organization

Our organizational capability enables us to provide an integrated construction service covering everything from the transportation of heavy items to installation. We have a network of facilities throughout Japan, and we possess a comprehensive range of special equipment and vehicles. We also benefit from the organizational capability of the Nippon Express Group as a whole, which is underpinned by a track record of success and by trust. Our organizational capability, and the synergies that it generates, constitutes a major strength for us.

History

In 1941, NIPPON EXPRESS founded the terrestrial heavy cargo department of what would later go on to become NX Engineering. In 1969, the group imported self-propelled 400-ton dollies dubbed "a revolution in heavy cargo transport," then in 2003 secured a patent for the "upright blade transport system" used to transport wind power blades up to 40 meters in size in diagonal or rotated positions.

These are just some of our equipment available for work on a scale no one else can manage. Furthermore, in 1990, we founded Nippon Express Engineering (Thailand), followed by Nippon Express Engineering (Vietnam) in 2014 and NEX Global Engineering in Singapore in 2016, all as parts of the active role we play outside of Japan.

Business Flow

Our greatest strength lies in our comprehensive project execution capabilities. NX Engineering delivers seamless, integrated solutions across all project phases – from initial planning and engineering to transportation, installation, and maintenance – both domestically and internationally.

A continuous cycle of leveraging our experience and proven track record to deliver ever more challenging and innovative projects.

Our Business

NX Engineering Co., LTD. will continue to support infrastructure development projects carried out by various industries and customers both domestically and internationally. By further enhancing our expertise in the heavy haulage and construction business, strengthening our workforce with highly skilled personnel, and providing high value-added services, we aim to contribute to the growth of our customers' businesses.

Transformer Equipment

As a heavy haulage industry leader, we offer optimized transportation using our proprietary vehicles and cargo carriers.

Wind Power Equipment

We are industry leaders in shipping and installation work. Let us use our extensive experience and techniques to support the spread of wind farms.

LNG / Hydro Power Equipment

Contributing to thermal power plant construction by providing unified services for everything from transportation to installation work.

Petrochemical Plant Equipment

We help with everything from construction to maintenance and upgrades over your facilities' full life cycle.

Semiconductor Manufacturing Equipment

We offer a one-stop solution for transporting, installation, and assembly of semiconductor manufacturing equipment for your clean room.

Transportation Infrastructure Equipment

Over a half century of performance and skill. From transporting Shinkansen carriages to bridge construction, we support Japan's transportation infrastructure.

International Projects

We provide end-to-end transporting for heavy and large equipment using a global network of land, air, and sea resources.
